内容概要

历年MBA、MPA、MPAcc考试结果证明：想过MBA、MPA、MPAcc。
必须做真题！

2009年，国家教育主管部门决定，将“工商管理硕士”MBA(Master of BusinessAdministration)入学联考的模式推广到公共管理硕士(MPA)教育和专业会计硕士(MPAcc)教育。
从2010年起，MBA、MPA、MPAcc入学考试使用同样的综合能力考试试题(满分200分)和英语试题(满分100分)，时间均为3个小时；因此英语考试采用了新题型。

目前图书市场上大量的MBA真题集，基本上都是老题型，很多书存在着答案错误，解析简单或冗长(如“该句的译文是”，“该题的答案是”等词语反复出现，浪费大量空间)等缺点。
遇到疑难问题，则要查字典、问老师。
不仅要花费很多时间与精力，还很难掌握考试规律。
该书正弥补了这方面的不足，同时增加了该书最具特色的解释部分。

章节摘录

By education , I mean the influence of the environment upon、 the individual to produce a permanent change in the habits of behavior , of thought and of attitude.It is in being thus susceptible (容易受影响的) to the environment that man differs from the animals.and the higher animals from the lower.The lower animals are influenced by the environment but not in the direction of changing their habits.Their instinctive responses are few and fixed by heredity (遗传 ; 继承) .When transferred to an unnatural situation , such an animal is led astray by its instincts.Thus the “ ant - lion ” whose instinct implies it to bore into loose sand by pushing backwards with abdomen (腹部) , goes backwards on a plate of glass as soon as danger threatens , and endeavors , with the utmost exertions to bore into it. It knows no other mode of flight , “ or if such a lonely animal is engaged upon a chain of actions and is interrupted.it either goes on vainly with the remaining actions (as useless as cultivating an unsown field) or dies in helpless inactivity ” .Thus a net-making spider which digs a burrow and rims it with a bastion (堡垒) of gravel and bits of wood , when removed from a half finished home。 will not begin again.though it will continue another burrow , even one made with a pencil. Advance in the scale of evolution along such lines as these could only be made by the emergence of creatures with more and more complicated instincts.Such beings we know in the ants and spiders.But another line of advance was destined to open out a much more far-reaching possibility of which we do not see the end perhaps even in man.Habits , instead of being born ready-made (when they are called instincts and not habits at all) were left more and more to the formative influence of the environment , of which the most important factor was the Parent who now cared for the young animal during a period of infancy in which vaguer instincts than those of the insects were molded to suit surroundings which might be considerably changed without harm.
