章节摘录

The Opening of Japan  
The Japan of the mid-nineteenth century was a shadow of the modern economic juggernaut that is now one of the world's leading traders. For hundreds of years, Japan had been secluded from the outside world by the strict policies of the rulers of Japan, the Tokugawa shoguns. With the exception of one Dutch ship per year at the port of Nagasaki, the Japanese refused to deal with foreign ships or nations. Sailors shipwrecked on the Japanese islands were treated harshly and often imprisoned. Passing vessels were refused food, water, and other provisions. With a goal to right these wrongs and to open Japan to trade, in 1853 the United States sent its most capable man, Admiral Matthew Perry, and four warships to open Japan to the rest of the world. The consequences of those actions are still being felt today. In the seventeenth century, the Japanese had opened their doors briefly to the Dutch and allowed a trading station and Christian enclave in Nagasaki. Guns were imported as part of this trade, and they were one of the reasons for a great upheaval that engulfed Japan for many decades, as a civil war raged between powerful shoguns, or warlords. Finally, Tokugawa emerged as the victor and claimed the lordship of Japan. During these upheavals, the emperor and his family had stood by wielding no power and existed merely as a figurehead.
