<<创造生命的奇迹>>

章节摘录

During the anti-cancer battle, in addition to the treatment plan from the medical establishment and medical staff, great perseverance from each cancer patient greatly helps in cancer treatment. Many cancer patients, though "sentenced to death" by doctors, instead of falling into depression, support and encourage each other, and join in the efforts to fight against cancer in an unremitting way. This book aims to introduce some cancer fighters, who share with us their experiences struggling against cancer, and how they have fought cancer with a smile.
