

<<管理科学>>

图书基本信息

书名：<<管理科学>>

13位ISBN编号：9787810443869

10位ISBN编号：7810443860

出版时间：1998-03

出版时间：东北财经大学出版社

作者：（美）温斯顿

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

书籍目录

Brief Contents

- 1 Introduction to Modeling
- 2 Introduction to Linear Programming
- 3 Linear Programming Formulations
- 4 Network Models
- 5 Integer Programming Models
- 6 Nonlinear Programming Models
- 7 Multiple-Objective Decision Making
- 8 Decision Making Under Uncertainty
- 9 Deterministic Inventory Models
- 10 Probabilistic Inventory Models
- 11 Queuing Models
- 12 Simulation
- 13 Simulation with Add-ins
- 14 Forecasting Models

Index

- 1 Introduction to modeling
 - 1.1 A Waiting Line Example
 - 1.2 The Seven-Step Modeling Process
 - 1.3 Successful Management Science Applications
 - 1.4 Why Study Management Science?
 - 1.5 Conclusion

References

- 2 Introduction to Linear Programming
 - 2.1 Introduction
 - 2.2 A Brief History of Linear Programming
 - 2.3 Introduction to LP Modeling
 - 2.4 The Linear Assumptions
 - 2.5 Graphical Solution Method
 - 2.6 Solver Reports and Sensitivity Analysis
 - 2.7 Sensitivity Analysis with Graphs
 - 2.8 Infeasibility and Unboundedness
 - 2.9 A Multiperiod Production Problem
 - 2.10 A Decision Support System
 - 2.11 Conclusion

Review Problems

Appendix: What's Best! for Lotus

Case Study: Shelby Shelving

References

- 3 Linear Programming Formulations
 - 3.1 Introduction
 - 3.2 Static Workforce Scheduling
 - 3.3 Blending Problems
 - 3.4 Production Process Models
 - 3.5 Aggregate Planning Models

- 3.6 Dynamic Workforce Planning Models
- 3.7 A Dynamic Financial Model
- 3.8 Data Envelopment Analysis (DEA)
- 3.9 Conclusion
- Review Problems
- Case Study: Lakefield Corporation's Oil Trading Desk
- Case Study: Foreign Currency Trading
- References
- 4 Network models
- 4.1 Introduction
- 4.2 The Transportation Model
- 4.3 A Dynamic Inventory Model
- 4.4 The Assignment Model
- 4.5 The Critical Path Model (CPM)
- 4.6 The Minimum Cost Network Flow Model
- 4.7 The Maximum Flow Model
- 4.8 The Shortest Path Model
- 4.9 Conclusion
- Review Problems
- Case Study: Optimized Motor Carrier Selection at Westvaco
- References
- 5 Integer Programming Models
- 5.1 Introduction
- 5.2 Capital Budgeting Models
- 5.3 The Fixed-Charge Model
- 5.4 The Lockbox Problem
- 5.5 The Warehouse Location Problem
- 5.6 Set Covering Problems
- 5.7 Either-Or Constraints
- 5.8 Conclusion
- Review Problems
- Case Study: Giant Motor Company 1
- References
- 6 Nonlinear Programming Models
- 6.1 Introduction
- 6.2 Basic Ideas of Nonlinear Optimization
- 6.3 Managerial Economics Applications
- 6.4 Salesforce Allocation
- 6.5 Facility Location Models
- 6.6 Improving Product Quality
- 6.7 Estimating the Beta of a Stock
- 6.8 Rating Sports Teams
- 6.9 Finding Implied Stock Volatilities
- 6.10 Portfolio Optimization
- 6.11 Portfolio Optimization: The Scenario Approach
- 6.12 Portfolio Optimization with Transaction Costs
- 6.13 Conclusion

<<管理科学>>

Review Problems

Case Study: GMS Stock Hedging

Case Study: Durham Asset Management

References

7 Multiple-Objective Decision making

7.1 Introduction

7.2 Goal Programming

7.3 Pareto Optimality and Trade-off Curves

7.4 The Analytic Hierarchy Process

7.5 Conclusion

Review Problems

Case Study: Play Time Toy Company

References

8 Decision Making Under Uncertainty

8.1 Introduction

8.2 Elements of a Decision Analysis

8.3 Assessing Probabilities (Optional)

8.4 Decision Analysis Examples

8.5 Bayes' Rule

8.6 Incorporating Attitudes Toward Risk

8.7 Conclusion

Review Problems

Case Study: Giant Motor Company II

References

9 Deterministic Inventory Models

9.1 Introduction

9.2 Categories of Inventory Models

9.3 Costs Involved in Inventory Models

9.4 The Basic EOQ Model

9.5 EOQ Models with Quantity Discounts

9.6 EOQ Model with Shortages Allowed

9.7 Reducing the Setup Cost

9.8 Synchronizing Orders for Several Products

9.9 Conclusion

Review Problems

Case Study: Subway Token Hoarding

References

10 Probabilistic Inventory Models

10.1 Introduction

10.2 The Newsvendor Model

10.3 Analysis of (R, Q) Policies

10.4 A Conclusion

Review Problems

Case Study: Retail Pricing Using Retailer

References

11 Queueing Models

11.1 Introduction

<<管理科学>>

- 11.2 Elements of Queueing Models
- 11.3 Short-Run Versus Steady-State Behavior
- 11.4 The Exponential Distribution
- 11.5 Important Queueing Relationships
- 11.6 The Basic Single-Server Model
- 11.7 A Multiple-Server Model
- 11.8 Variations of the Basic Models
- 11.9 The Erlang Loss Model
- 11.10 Conclusion
- Review Problems
- Case Study: The Catalog Company Problem
- References
- 12 Simulation
- 12.1 Introduction
- 12.2 Actual Applications of Simulation
- 12.3 Random Numbers
- 12.4 Introduction to Spreadsheet Simulation
- 12.5 Generating Other Distributions
- 12.6 Simulation and Bidding
- 12.7 Deming's Funnel Experiment
- 12.8 Simulating the Length of a Project
- 12.9 Investing in the Stock Market
- 12.10 Simulating Cash Flows
- 12.11 Queueing Simulation
- 12.12 Conclusion
- Review Problems
- Case Study: Ski Jacket Production
- Case Study: The College Fund Investment Decision
- Case Study: Ebony Bath Soap
- Case Study: Bond Investment Strategy
- References
- 13 Simulation With Add-ins
- 13.1 Introduction
- 13.2 Simulating an Income Statement
- 13.3 The Newsvendor Model with (a) RISK
- 13.4 Financial Planning Simulations
- 13.5 A Component Redundancy Simulation
- 13.6 Simulating the Game of Craps
- 13.7 A Cash Balance Simulation
- 13.8 Simulating Stock Prices and Options
- 13.9 Simulating Correlated Values
- 13.10 A Market Share Simulation
- 13.11 Conclusion
- Review Problems
- References
- 14 Forecasting Models
- 14.1 Introduction

- 14.2 Time Series Notation
- 14.3 Moving-Average Method
- 14.4 Simple Exponential Smoothing
- 14.5 Holt's Method for Trend
- 14.6 Winter's Method for Seasonality
- 14.7 Simple Linear Regression
- 14.8 Fitting Nonlinear Relationships
- 14.9 Multiple Regression
- 14.10 Categorical Independent Variables
- 14.11 Multiplicative Models
- 14.12 Conclusion
- Review Problems
- Reference
- Index
