

<<国际振动工程会议论文集>>

图书基本信息

书名：<<国际振动工程会议论文集>>

13位ISBN编号：9787810543316

10位ISBN编号：7810543318

出版时间：1998-07

出版时间：东北大学出版社

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

<<国际振动工程会议论文集>>

书籍目录

CONTENTS

Volume I

Keynote Lecture

Modeling damping in mechanical engineering structures

Michel Lalanne.

Detection for structural damages and nonlinearity-Application of wavelets transform technique

Lai Ah Wong and Jay Chvng Chen

Orthogonality of modes for piecewise continuous structures

K L Chan and Frederic Ward Williams

Neural Network simulation of Magnetorheological damper behavior

Jin Zhang and Pau! N. Roschke

High Efficiency Computation of the Variances of Structural Evolutionary Random Responses

Lin Jiahao. Zhong W.X, Zhang W. and Sun D.K

Some Problems in the Study of Nonlinear Dynamics of Large Scale Rotor System

Chen Yushu and Ding Qian

Dynamics of mechanical systems

Time Dependent Correlation Function of Linear Systems Excited by Nonstationary Specially Varying Excitation

Zheng Zhaochang and Lin Xi

Finite element analysis of critical running speeds of high-speed flexible mechanisms

Shudong YU and M L Cleghorn

Robust Stability Test for Vibrating System with Delayed State Feedback

Hu Haiyan and Wang Zaihua

Dynamics of closed manipulators with dry friction in joints and flexible drives

A. Harlecki and S. Wojciech

Modal Reanalysis for Topological Modifications of Structures

Chen Suhuan and Huang Cheng

About dynamic and regulation of speed of mechanical non-holonomic system

M. Zlokolica and Jovan Vlastic

Reliability Analysis of Random Multi-Degree-of-Freedom Nonlinear Vibration Systems

Zhang Yiming and Wen Bangchun

On some specifics of the dynamics of mechanisms

Jean Lerbet

Mixed Sensitivity H. Design for Vibration Control of Piezoelectric Smart Beam

Zhang hongwei. Xu Shijie. Zheng Gangtie and Huang Wenhua

A new computational technique in whirl fuller analysis

JK Liv and HC Chan

Dynamic characteristic analysis of reactor main coolant pump

Letian Wang, C. W. Lee and J. H. Seo

On the dynamic analysis of the load lifting machines

Jovan Vlastic, Miodrag Zlokolica

The Study on the Dynamic Characteristics of the Hydraulic Vibrating Mechanism in Mine Shipping Equipment

Zhao Chunyu, Zhao Guangyao, Liu Jintao, Lin Guiyu and Wen Bangchun

Statistical Dynamics Study on the Longitudinal Vibration of Blast Hole Drill Rotary Machine

Zhang Yanchun, Song Guiqiu and Li Kuixian

An effective method for analyzing the effect of structural asymmetry on dynamics of an aircraft

JK Liu, and HC Chan

The Stability of Electric-Mechanical Coupled Vibration of Power Transformer Windings

Wang Zhangqi Qi Zhiming and Yan Kang

The Kinematics characteristics choice of dynamical parameters bases of storage crane

Miomir Jovanovic, Zoran Marinkovic, Dragan Zivanovic and Danko Mijajlovic

Time-Domain Averaging of High Precision Integration and System Order-Extension Method for Stochastic Finite Element

Zhang Senwen, Cao Kaibin and Chen Quifu

Structural Optimum Design by Sensitivity Analysis

Bao Ju and Yang Kun

Theoretical Analyses on Triple Resonances of a Torsional Vibration of a Generator Set System

Yang Zhian Qiu Jiajun and Li Wenlan

Computer Aided Dynamic Analysis and Calculation of Metallurgical Mechanical Main Driving System

Wang Zhanghai and Wang Dejun

The Influence of the Spindle Speed Varying Shape on the Effectiveness of Cutting Chatter Suppression

Gao Guoli, Wang Qiyi and Wang Rende

Study on Dynamic Characteristic of the Load Swing of Hydraulic Crawler Crane

Wang Bangfeng, Zhang Guozhong and Guo Lixin

Dynamic Analysis on Placing Boom System of Truck Concrete Pump

Guo Lixin, Zhang Guozhong and Wang Bangfeng

Study on Dynamic Load of Lift System of Excavator

Li Kuixian, Peng Wuliang and Zhou Li

The Reasonable Test to the Dynamic Characteristics of Robot

Hu Ming, Wang Qiming, Yuan Suoxian and Cai Guangqi

Material's Movement on the vibrated Machine in the Effect of Fluid

Li Liyin, Liu Jintao and Song Jun

Quantitative Diagnosis Study of Failures for Automobile Engine Connecting Rod with Vibration Signal

Zheng Dianwang, Gao D, Zhang L and Lu L.G

Research on the Variable Mass Parameter Collision in Vibration Mill

Wang Shulin, Li Jinguang, Gao Qiuzhi and Hu Yiqing.

Active Ambulance Stretcher Suspension Using Frequency-Shaped Performance Index Quality Improvement

Qi Jiancheng, Li Ruoxin, Liu Zhiguo and Xu Xinxi

Effect of Gear Width on the Dynamic of a W-N Gearing with Double-Circular-Arc Tooth Profile

Wu Baolin, Li Jinbao and Shao Jiahui

Advances and Trends of Metal Plastic Deformation Processes with Vibration

He Qing, Wang Kedong, Han Qingkai and Wen Bangchun

Study and Manufacture of a Miniature Vibration Conveyor

Wang Deshi and Xiang Hui

Torque Analysis of Permanent Magnet Using Coupling 2D Elements Methods

Cong H.B and Zhao C.Y.

The Transverse Swing and Prevent Measures about the Resonant Probability Screen With Inertial Exciter

Xu Xiaonan, Li Xiaoqiu, Xu Xintao and Liu Jie

The Dynamic Analysis of Flexible Drive System of Heavy Spheroid Machine

Yu Xiao Guang, Xiang Yinghua, Song Hua, Wang Lugong and Deng Yongsheng

Dynamic Behavior of Jig Made of Polymer Mineral Composite

Sun Jie, Li Jianfeng, Han Baohua, Wang Jisen and Chen Yanqiu

Modal analysis and experiment

A New-Type Subspace Iteration Method for Generalized Eigenproblems

Qu Zuqing., Hua Hongxing, Fu Zhifang and Zhao Cai

A State Space Method for Eigenvalue Problem and Their Sensitivities of Frequency Dependent System

Fu Zhifang, Zeng Qinian and Qu Zuqing

Wavelet Transform in Modal Analysis and Identification

Wu Xinyue, Shi Yin, Zhu Shijian and Yang Dong

The Flexibility Matrix of Elastic-Support Stepped Beam Established by the Influence Coefficient Method

Liu Xiequan, Ni Xinhua and Yan Shi

The Natural Character Analyses of Recoilless Gun Barrel Flexural Vibration

Ni Xinhua, Liu Xiequan and Yan Shi

Nonlinear vibration and random vibration

A variational solution method applied to a nonlinear water-structure interaction system

J. T. Xiang and W G Price

Analysis of Nonlinear MDOF Structures Subjected to Multi-phase Stationary Random Excitations

Wang Jun and Lin Jiahao

Nonlinear behavior of structures under dynamic disturbances

Bulent A. Ovunc.

Study the Parameter Uncertain Nonlinear System with Coexisting Attractors by Cell Mapping Method

Gong Pulin and Xu Jianxue

The evaluation of the influence of elastic-viscous properties of a crane-runway on the transport-technological vehicle (TTV) random fluctuations

Albert. M. Zakhezin, Tatyana. V. Malysheva and D. U. Ivanov..

Nonlinear Vibrations of Non-Smooth Dynamic System by a New Method

Xu Mingtian and Hu Haiyan

A New Approach to Nonlinear Vibrations of Orthotropic Thin Circular Plates

Liu Renhuai and Li Dong

The Diagnosis System of Crack Fault in Shell

Luo Yuegang, Wang Qi, Bijiechun and Jin Shengji

Identification of Nonlinear Force of Vibration System Using Radial Basis Function Networks

Zhao yonghui, Tu Liangyao, Zuo Jingxiang and Li Guiping

Global Bifurcation of the Horizontal rotators

Wang Huailei and Cao Qingjie

Impact Dampers for Hysteretic Nonlinear System with Multi-Frequency Excitations

Yuan Xiangrong, Yang Shaopu and Chen Enli

The Combination Resonance in a Multi-Degree-of Freedom Hysteretic Nonlinear System with Multi-Frequency Excitation

Chen Enli, Yang Shaopu and Yuan Xiangrong

Effects of Generalized Lorentz's Force

Ma Shilin, Hu Yuda, Bai Xiangzhong and Xu Yaoling

Nonlinear Dynamic Snap-through Buckling of Composite Laminated Spherical Caps

Yang Yiqian, Zhang Duan, Zhou Hongye, Ma Hezhong and Wang Tsun-Kuei

Finite Element Modeling and Impact Calculation of a Huge Vessel

Wang Yu, Shen Rongying and Hua Hongxing

Study on the Stability and Bifurcation Behavior of the Vibration System with Nonlinear Hysteresis Properties

Yuan H.Q., Wen Bangchun and Han Qingka

Nonlinear Oscillation with Fractional Derivative and its Approximation

He Jihuan

Self-excited Vibration in Rolling Mill with Clearance via Asymptotic Method and Numerical Method

Li Hongguang, Yang Wenping and Wen Bangchun

Nonlinear Vibration of Mechanical System with Asymmetrical Piece-Wisely Curvature Hysteresis

Han Qingkai Gong Zhaomin, Liu Shuying and Wen Bangchun

Bifurcation in Nonlinear Mechanical System with Piece-wise Linearity

Wen Chengxiu, Wang Jiancai, Wen Bangchun and Nie Yiyong

Dynamic Experiment and Application of Electromagnetic Effect Stimulated by Strain Wave

Xing Guojun and Xu Xiaohe

Chaotic Vibrations of a Cantilevered Pipe Conveying Fluid

Zou Guangsheng and Jin Jiduo

Nonlinear Oscillation and Chaos of an Enzyme Reaction System

Wang Li, Zhou Yanming and Niu Sen

Nonlinear Oscillation of Charge Distribution on Conducting Plate

Xiang Yumin

The Nonlinear Axisymmetric Vibration of a Cylindrical Shell in a Longitudinal Magnetic Field

Hu Yuda, Xu Yaoling, Ma Shilin and Bai Xiangzhong

Response of the Impact Damper to Gauss White Noise Random Excitation

Qi Zuotao

Nonlinear Dynamic Analysis of Cutting Chatter

Liang Zhiquan

Structural dynamics and dynamics of soil

Algorithm of quadrilateral element for meshless finite elements method on parallelled environment

Changqi Yang, Tomonari Furukawa and Genki Yagawa

Study on Bifurcation of Harmonically Excited Two-degree-of-freedom Spring-pendulum System with Internal Resonance

Zhang Mindi, Wang Tieguang and Zhang Minqiu

Genetic algorithm coupled with the Tabu search method for optimum design of a damping plate

Bo Suk Yang, Byung Gun Choi and Young Hun Yu

Dispersion Characteristics of Rayleigh Wave in Saturated Soil

Wu Shiming and Xia Tangdai

Wave Number Method for Out-plane Dynamic Response

Xia Tangdai and Wu Shiming

Supersonic Flutter Calculation of a Wing with High Angle of Attack by Local Flow Piston Theory

Song Weili and Yang Binyuan

Researches on the Constraints of Flexible Multibody System

Hao Changzhong, An Xiaowei and Dou Jinshan

Some Practical Techniques of Finite Element Mesh Generation for Multiconnected Domain

Zhang Hua An Xiaowei and Fu Yao

FE Mesh Generator for the Thin-Walled Parts with Flat Pattern

An Xiaowei, Hao Changzhong and Zhang Hua

Chaotic Motions of a Pipe Conveying Fluid Under Harmonic Excitation

Jin Jiduo and Zou Guangsheng

Study and Applications of Artificial Vibration in Oilfield Development

Sun Renyuan, Ning Kui, Guan Jiuzhou and Xie Weiming

Affecting Element Analysis of Dynamic Characteristic of Pile

Wei Xinjiang

<<国际振动工程会议论文集>>

- Study on Dynamic Characteristics for Vibration Isolation System of the Vibrating Road Roller  
Wan Hanchi, Wang Huajun, Xu Tianning, Tao Yongsheng, Zhou Cuanli and Liu Ping
- Research and Application of Dynamics of Oscillation Road Roller  
Li Zhong, Lei Ting, Lu Shimin, Liu Keshu, Kong Qinghua, Ma Naiqing and Du Haichao
- Vertical Seismic Action on Megastructure Systems of the Buildings  
Li Zhengliang, Bai Shaoliang and Yuan Zhengqiang
- The Structural Dynamic Analysis of Long-span Arch Bridge of Concrete Filled Steel Tube  
Xu Xiaofeng, He Xuefeng, Tang Guangwu and Huang Fuwei
- Design Scheme of Seismic Simulation Testing System for Long-span Bridge Structures  
Zhang Li, Xu Xiaofeng, Tang Guangwu and He Xuefeng
- Application of Newmark- P and Characteristic Methods to Analysis of Response of Pile-Soil System to Impact Loading  
Chai Huayou, Li Tingjie, Fu Bo and Luo Jinghui
- Analysis of Local Vibration of a Plate-type Structure in Incompressible Viscous Liquid  
Yang Yiren, Gao Shuying and Zhang Jiye
- The Development of Controllable Epicenter and Study of Its Mechanism  
Fu Yao, Wen Bangchun, Li Yinong, Wan Shuiyu, Li Jingzhi and Men Buzai
- The Effect and Control of the Soil Compacting on the Method of Rolling Impact  
Zhang Hong, Liu Jinliang and Fan Cuilin
- Partial Effect in Structural Dynamic Analysis  
Qu N.S., Yang Chunqiu, Zhong W.Q and Yang C.P
- Volume II
- Rotor dynamics
- Control Method for Nonlinear Rotor System Using Artificial Neural Network  
Lu Bei, Cao Dewu and Zhao Me
- The Vibrational Behavior of Jet Engine Rotor Blades  
Wang Keming and Goodarz Ahmadi
- Identifying the Unbalances of Flexible Rotors by Boundary Element Method  
Zhu Xiaodong and Gao Wei
- Study on Nonlinear Vibration of Rotor-Bearings System with Large Unbalance  
Liu Chusheng, Zhao Yaomin and Yao Xingang
- Nonsynchronous Responses and Bistable Operations of a Rotor Supported on Uncentralised Squeeze Film Damper  
Zhu Changsheng
- Multiple Squeeze Films Electro-rheological Damper and its Application to the Vibration Control of Rotor System  
Yao Guozhi, Meng Guang, Fang Tong, Qiu Yang and Fan Yanbin
- The Transfer Matrix Method for Multi-body Dynamics  
Huang Baohua, Yang Jianguang and Gao Wei..
- Approach to the Initiative Design Method of the Partial Constrained Layer Damping  
Su Suying and Kang Fenghua
- Dynamic Analysis of a Rotor Supported with Unsymmetrical Metal Wire-cable Springs  
Song Fangzhen, Ma Yuzhen and Song Bo
- Floquet Theory's Application in the Theoretical Research About Stability of a Rotor System with a Crack  
Wang Fenglan, Han Junyi, Sha Yuzhang and Wen Bangchun
- Vibration and noise control
- Indirect identification of transmission forces through rubber bushing in vehicle suspension system by

using vibration signals on links

Kwang-Joon Kim, Chang-Kook Chae and Byung-Kook Bae

Power Transmission from Vibrating Sources through an Intermediate Rigid Plate to a Flexible Foundation

Song Kongjie, Huo Rui and Sun Yuguo

Impedance-based technique and wave propagation measurement for non-destructive evaluation

Li Yinong JiangZhongwei, Seiji Chonan Gao Feng and Wei Bangchun

Vibration Control of Intelligent Truss Structures Using Self-Sensing Piezoelectric Actuators

Nie nmln. Yang Guozhan andShao Chengxun

Study on dynamic characteristics of the slow-changing of intelligent structure

Li Yinong, Wen Bangchun, Jiang Zhongwei, Seiji Chonan and Gao Feng

Response Analysis of Floating Raft Isolation System

Zhang Zhiyong, Shen Rongying and Wang Chenggang

Active suspension of ambulance stretcher

Taro Shimogo, Masaaki Kawana and Takeshi Uenoyama

Predictive Control of Wind-Induced Vibration of Structures

Ma Kougen. Xu Hanfeng and Gu Zhongquan

An Experimental Study of a New Gear Tooth Surface Optimum Modification Curve

Wang Xiaochen, Zhang Shusheng and Song Kongjie

Dynamic Responses of Adaptive Structures

Zhang Lianwen, Xia R. W. and Zeng G. W.

The New Study of Sinusoid Profile Modification Curve in Reducing the Vibration and Noise of Gear

Transmission System

Zhu Chuanmin. Tian Zhiren and Song Kongjie

Theoretical Study of an Isolator-Absorber for Reducing Vibration Response

Chen Shuhui, Doninix Pun, S. Law and Du J. W.

Hybrid Active and Passive Control of Vibratory Power Flow in Flexible Isolation System

Xiong Yeping, Wang Xiping, Han Yuchang and Song Kongjie

The Method of Calculating Precise Amplitude Frequency and Damping by FFT/FT

Liu Jingming, Yin Huaiqiao and Shen Song

The Sensitivity Analysis of Floating Raft System Isolators

Zhang Yu, Han Zushun and Han Wenxiong.

Development and Status of Damping Technology

Meng Changhong, Zhu Mengzhou and Wang Taiyong

Experimental Research of the Noise in Automobile Diesel Engine

Zhang Biaobiao Wang Xuehuai, Zhang Zongjie and Liu Yongchang

Study on Damping Behavior of Polymer Mineral Composite

Wang Jisen, Li Jianfeng, Sun Jie, Chen Yanqiu and Ai Xing

Modal Control of Smart Plates Using Segmented Piezoelectric Sensors and Actuators

Sun Dongchang, Wu Hongxin and Wang Dajun

Attitude Vibration and Stability of Spacecraft with Flexible Solar Array

Ge Xinsheng, Zhang Yong and Gu xiaoqin

The Analysis of Active Vibration Control for the Picking Plate of Shuttle Loom

Hong Yan, Jiang Feng and Wang Tieguang

Application of Genetic Algorithms to Active Vibration Control

Du Liqun, Yan Yunhui, Ma Zhiguo and Wang Dejun

Optimal Disposition of Sensor/Actuator in Intelligent Structures Based on Genetic Algorithms

Yan Yunhui, Du Liqun, Ma Zhiguo and Wang Dejun

<<国际振动工程会议论文集>>

- Hybrid Position/Force Control of an Active Suspension Mechanism for Vehicle over Rough Terrain  
Liu Hongyi, Zhou Xianlian and Deng Yongsheng
- Application of Vibration Isolating Technology in the Noise Reduction of Inertial Vibrating Machines  
Li Ji, Ding Zijia and Hu Ping
- A Study of Modal Impedance Synthesis Method in Complex Isolation System  
Liu Yongming, Wang Chenggang and Shen Rongying.
- Noise and Vibration Attenuation in Cabin of High-Speed Patrol Boat  
Sun Guangsu, Yu Shuji, Zhang Guoliang, Sun Tianlei, Hu Xiaohua, Lu Zongqiang and Qin Hongfa
- Statistical Energy Analysis of Waveguide Vibration Absorber for Beam  
Cao Mingyi, Huang Qibai and Liao Daoshun
- An Inverse System for Chaotic Attitude Motion of Spacecraft  
Chen Liqun and Liu Yanzhu
- A Computer Program for General Vibration Isolating System  
Huang Yingyun and He Lin.
- A New Method for Separation Test Method of the Internal-combustion Engine Noise  
Li Zhongfu
- Strategy Design of Vibration Control for Intelligent Beam Structures  
Ma Zhiguo, Du Liqun, Yan Yunhui and Wen Bangchun
- Fuzzy Self-adjustment PID Parameter Control on Vibratory Fixed Quantity Feeding System  
Liu Jie, Yu Chunsheng, Wang Jing and Xu Xintao
- Vibration measurement and signal processing  
Using Vibration Signals to Monitor Machine Condition  
Li Zhimin, Wang Yi and Song Xigeng
- Study on Mathematical Description of Time-varying Noise and Measuring Method of Its Sound Intensity  
Chen Jian, Chen Xinzhao and Gan Xiangsheng
- Analysis on Force Sensing Technique and Disturbance Compensation for Robot's Multi-Axis Wrist Force Sensor  
Liu Zhengshi, Chen Xinzhao and Lu Yimin
- The Volume Source Boundary Point for the Exterior Acoustic Radiation Problem  
Zhang Shengyong and Chen Xinzhao.
- The Process about Boundary Abnormal in Wavelet Analysis of Vibrational Signal  
Li Xianglai, Li Shunming and Xu Qingyu
- The Method of Fractal Filtering Wave of Vibration  
Hou Xianglin, Yin Heji, Wang Tiegua and Ma Zhiguo
- The Application of Entropy Spectral on Vibration Signals Analysis  
Mao Huiou, Run Liyi and Deng Yongsheng
- Research on Using Parallel Mechanism in Instrumentation for Measuring  
Yu Xiaoliu, Wang Qiyi, Zhao Mingyang and Zou Hao
- Analysis and Determine of the Vibration Source of Blast Hole Drill  
Ren Liyi, Lin Li and Zhang Shujia
- Experimental Comparison Between Auto-Regressive Spectrum and Classical Spectrum  
Yang Yuming and Sheng Shengwo
- Analysis for Movement of the Air-to-retract Cannon During Its Firing  
Zhen Zhenhua, Qiu Xuejun and Xu Guoqiang
- Fault diagnosis and others  
The safety problems in computer aided design of machinery for technical rescue work  
Jerzy Wrobel and Andrzej Machniewski
- Study on development of soft tactile sensor for palpation diagnosis (Development of prostatic palpation probe)

<<国际振动工程会议论文集>>

- Zhongwei Jiang, Seiji Chonan, Yoshikatu Tanahasi, Mami Tanaka and Masatomo Kamei.  
A new method for the analysis of nonstationary nonlinear vibration signal and its use in machine fault diagnosis
- Yu Bo and Ma Xiaojiang  
Transportation damage of corrugated paper in a vibration environment
- Didier Egureguy, J L Lataillade and Dr F. Vidal  
A New Study to Examine the Quality of Civil Engineering by Applying Neural Network Technique and Fuzzy Mathematical Theory
- Li Guihua, Qi Baohui, Sun Fanfu, Sun Yuanguai and Xu Shibin  
Using acoustic signals in machine condition monitoring
- A Y T Levng and Li Weidong  
A Synthesis Evaluation Method of the Ground Loading Capacity
- Sun Guo, Li Guihua and Li Zhiguo  
Research on damage assessment of cracked beam by using genetic algorithms
- Gao Feng, Jiang Zhongwei, Li Yinong, Seiji Chonan and Wang Dejun  
Non-Time-step-Parameter Time Finite Method and its Application in Dynamics of Space Structures
- Liu Tielin, Xing Kuntao, Qi Baohui and Li Guihua  
Finite element modeling of the human head (modal and temporal validation)
- R. Willinger, B.M. Diaw and H.S. Kang  
Study of the Selection and Optimization of Correction Planes and Their Estimation Criteria in Multiplane Balancing
- Wang Xiaosheng and Ma Xiaojiang  
Evaluation of quality of the construction based on the analysis of vibrations of oscillating conveyor
- Grzegorz Klekot, Jacek Dziurdz and Jaroslaw Ankwicz  
Vibration Analysis of Mixed Flow Hydraulic Turbine Runner
- Zheng Xiaozhong and Tang Weixiao  
Nonlinear Analysis in Gearbox Fault Diagnosis Using Correlation Dimension
- Jiang Jiandong and Chen Jin  
On the Reciprocating Machinery's Random Vibration Behaviors and Dynamic Diagnostics
- Geng Zunmin, Yu Tao, Ya Min and Song Kongjie  
Research of Multi-layer Perceptrons Neural Networks for Fault Diagnosis
- Chen Changzheng, Liu Xinhong, Zhang Sheng and Yu Heji  
Study on Self-Learning for Vibration Fault Diagnosis System of Rotating Machinery
- Ge Zhihua, Li Ruxiang and Song Zhiping  
Diagnosing Diesel Engines with the Fractal Reason Model
- Shi Boqiang, Liao Ming and Yang Wenping  
Application of Mixed Genetic Algorithm in Artificial Neural Network
- Fang Liangzhou, Liu Xin, Tong Jiexin and Duan Qijun  
Capturing Fault Signal of Using Absolute and Relative Changes of Orbit
- Guan Huiling, Han Jie, Liang Chuan, Yang Jincai and Hao Wei  
The Study on the Self-Learning Function of Fuzzy Diagnosis
- Yang Jincai, Han Jie, Guan Huiling, Hao Wei and Liang Chuan  
Analysis of Vibration Signals for Large-power Automobile Engine Based on Wavelet Packets Theory
- Yang Wenping, Li Hongguang, Shi Boqiang, Guo Yunsan and Ren Liyi  
The New Time Domain Method for the Identification of Hydroturbine's Modal Parameters
- Tang Weixiao, Liang Zhiqiang, Chen Shongying, Leng Xia and Zheng Xiaozhong  
Location of a Crack by Neural Networks Using Time-History Data
- Wang Jizong, Wang Xijuan, A. De Stefano and D. Sabia
