

<<医药英语阅读教程>>

图书基本信息

书名：<<医药英语阅读教程>>

13位ISBN编号：9787811108187

10位ISBN编号：7811108186

出版时间：2010-8

出版单位：北京师范大学出版集团，安徽大学出版社

页数：228

版权说明：本站所提供下载的PDF图书仅提供预览和简介，请支持正版图书。

## <<医药英语阅读教程>>

### 前言

随着医学现代化的发展,英文医学文献浩如烟海。

阅读英语医学文献的能力成为我们医学院校学子必须具备的基本技能之一。

《医药英语阅读教程》是我们教研室英语教师献给医药学生的一份礼物。

它是在教学实践的基础上,根据学生的需求编写而成的。

国家教育部新颁布的全国《大学英语教学大纲》(修订本)明确指出:“本科学生在完成基础阶段的学习任务,达到四级或六级后,都必须修读专业英语,以便从基础学习阶段过渡到应用阶段。”

而许多医学学生感到英语学习是一个沉重的负担,花费太多的时间和精力,但目前所学的英语对今后并没有实用价值。

针对这一难题,我们组织编写了这本《医药英语阅读教程》,旨在帮助医学本科生顺利地由基础英语学习阶段过渡到英语应用阶段。

在编写过程中,我们力求通过每篇文章的编排让学生掌握有关医药学英语文体的写作特点及常用词汇,以期提高其阅读能力,达到教学目标。

课本内容尽力涵盖各科室各种病的常用英语,对一些较难的医学术语给予了翻译,在他们未来的门诊询问、开药处方、病情查房、病例书写、论文撰写、浏览医学英语文献等方面大有帮助。

这本书题材多样,篇幅长短适宜,并配有相应的测试题,全书独立成篇。

虽然编者竭尽全力想给读者提供最佳产品,但因时间仓促,且水平有限,书中错误遗漏之处在所难免,恳请读者使用时不吝赐教。

## 书籍目录

Lesson One Internal Impairment Due to Seven Emotions Lesson Two Learning to Live with Pests Lesson Three Sleep Easy Lesson Four Drugs Lesson Five Late-night Drinking Lesson Six The Announcement Lesson Seven The Best Ways Lesson Eight The Relationship Between Blood and Body Fluid Lesson Nine New U.S. Plan for Disease Prevention Lesson Ten A Study on the Effect of Passive Smoking Lesson Eleven Is the News Believable? Lesson Twelve Hepatitis A Sickens 64 Lesson Thirteen The Contraindication for Gatifloxacin Lesson Fourteen Ulcers Lesson Fifteen The Immune System Lesson Sixteen Medical Plants(1) Lesson Seventeen Medical Plants(2) Lesson Eighteen Massage Therapy Lesson Nineteen The Body Clock Lesson Twenty The Development of American Medical Education. Lesson Twenty-one Childhood Obesity: The Health Issue Lesson Twenty-two Chinese Medicine Extracts Effective in Combating Diabetes Lesson Twenty-three Catch Them Young Lesson Twenty-four What Is Rehabilitation? Lesson Twenty-five Brain Wave Lesson Twenty-six Ancient Chinese Remedy in Preventing Breast Cancer Lesson Twenty-seven Chinese Medicines Great Waste of Resources Lesson Twenty-eight The Difference Between Allopathic Medicine and TCM Lesson Twenty-nine The Magic Anti-tumor Herb——Matrine Lesson Thirty The Five-element Theory Lesson Thirty-one Leptin and Obesity Lesson Thirty-two Chinese Acupuncture Lesson Thirty-three Cholesterol and Health Lesson Thirty-four The Small Intestine Lesson Thirty-five Vaccines Against Cancer Lesson Thirty-six Researches on the Prostate Cancer Lesson Thirty-seven Test for Cervical Cancer Lesson Thirty-eight Five Forms of Hepatitis Lesson Thirty-nine Cardiologist Says Vioxx Still a Risk After Stopping Lesson Forty Magic Chinese Herb Lesson Forty-one Gene Therapy Could Cure Muscular Dystrophy Lesson Forty-two Where Did Aspirin Come From? Lesson Forty-three Traditional Chinese Medicine with a Long History (1) Lesson Forty-four Traditional Chinese Medicine with a Long History (2) Lesson Forty-five Vitamins and Health Lesson Forty-six Himalayan Salt Crystal Lamps Lesson Forty-seven Sub-health——the Third Health Condition Lesson Forty-eight Surviving Cancer Lesson Forty-nine Self-medication Lesson Fifty Breast Cancer Screening and Prevention Keys

## 章节摘录

The seven emotions refer to joy, anger, anxiety, contemplation, grief, fear and terror which are different responses of the body to the environmental stimuli and are normal psychological activities. Normally the seven emotions will not cause disease, but sudden, violent or prolonged emotional stimuli, beyond the range of physiological activities, will cause disorder of qi activity and disharmony of visceral yin, yang, qi and blood which consequently lead to disease. Since these seven emotions are endogenous and directly affect visceral qi and blood, the internal disorder caused is called "internal impairment due to seven emotions". The seven emotions are the physiological responses of visceral qi, blood, yin and yang. Different visceral qi, blood, yin and yang differ from each other in moving styles, leading to different emotional responses. In Huang Di Nei Jing~, the seven emotions are matched with the five viscera: the heart governs joy, the liver governs anger, the spleen governs contemplation, the lung governs grief, and the kidney governs fear. Terror and anxiety are also closely related to the activity of qi in the five zang-organs. The attribution of the seven emotions to the five zang-organs is not absolute. On the one hand, the same viscus may produce different emotional responses because of different pathophysiological states. For example, excess of liver-qi causes anger while deficiency of liver-qi brings on fear; excess of heart-qi brings on joy while deficiency of heart-qi leads to grief; etc. On the other hand, the seven emotions are exclusively dominated by the heart. In fact all the emotional activities are controlled by the heart and all the emotional responses are the manifestations of heart-spirit.
