章节摘录

"People now have the opportunity of expressing support for Obama every day," says Daniel Effron at Stanford University in California. "Our work arouses the concern that people may now be more likely to raise negative views of African Americans." On the other hand, he says, it may just encourage people to talk more honestly about their feelings regarding race issues, which may not be such a bad thing. Another part of the study suggests far more is at stake than the mere expression of views. The Obama effect may have a negative side. Just one week after Obama was elected president, participants were less ready to support policies designed to address racial inequality than they had been two weeks before the election. Huge obstacles It could, of course, also be that Obama's success helps people to forget that a disproportionate number of black Americans still live in poverty and face huge obstacles when trying to overcome these circumstances. "Barack Obama's family is such a salient (filmily) image, we generalize it and fail to see the larger picture—that there's injustice in every aspect of American life," says Kaiser of the University of Washington in Seattle. Those trying to address issues of racial inequality need to constantly remind people of the inequalities that still exist to counteract the Obama effect, she says.
