<<猫摄影CATS CATS AND MOR>>

内容概要

This photographic tribute to our feline friends provides a uniquely intimate appreciation of cats by depicting them au naturel, going about their day in domestic comfort or exploring the wild, blinking and snoozing in the sun, batting at toys, curled up in an armchair, play-fighting with siblings, dangling from ledges, perching and pouncing, and purring with pleasure. Artfully shot by an acclaimed photographer in sensual, rustic settings, these images of many breeds manage to achieve something remarkable by capturing the very essence of feline nature. With a poetic, insightful text and chapters devoted to adorable little kittens along with close-ups of the most mysterious of all beastly aspects, the cat ' s eye, this special volume practically crackles with the sounds of our contented whiskered companions—and their human admirers.

书籍目录
