<<量子不变式>>

内容概要

This book provides an extensive and self-contained presentation of quantum and related invariants of knots and 3-manifolds. Polynomial invariants of knots, such as the Jones and Alexander polynomials, are constructed as quantum invariants, i.e. invariants derived from representations of quantum groups and from the monodromy of solutions to the Knizhnik – Zamolodchikov equation. With the introduction of the Kontsevich invariant and the theory of Vassiliev invariants, the quantum invariants become well-organized. Quantum and perturbative invariants, the LMO invariant, and finite type invariants of 3-manifolds are discussed. The Chern – Simons field theory and the Wess – Zumino – Witten model are described as the physical background of the invariants.

书籍目录

Preface

Chapter 1 Knots and polynomial invariants 1.1 Knots and their diagrams 1.2 The Jones polynomial
1.3 The Alexander polynomial

Chapter 2 Braids and representations of the braid groups 2.1 Braids and braid groups
2.2 Representations of the braid groups via R matrices 2.3 Burau representation of the braid groups

Chapter 3 Operator invariants of tangles via 3.1 Tangles and their sliced diagrams 3.2 Operator invariants of unoriented tangles
3.3 Operator invariants of oriented tangles

Chapter 4 Ribbon Hopf algebras and invariants of links 4.1 Ribbon Hopf algebras 4.2 Invariants of links in ribbon Hopf algebras
4.3 Operator invariants of tangles derived from ribbon Hopf algebras 4.4 The quantum group $U_q(\mathfrak{sl}_2)$ at a generic q
4.5 The quantum group $U_c(\mathfrak{sl}_2)$ at a root of unity

Chapter 5 Monodromy representations of the braid groups from the Knizhnik-Zamolodchikov equation 5.1 Representations of braid groups derived from the KZ equation
5.2 Computing monodromies of the KZ equation 5.3 Combinatorial reconstruction of the monodromy representations
5.4 Quasi-triangular quasi-bialgebra derived 5.5 Relation to braid representations derived from the quantum group

Chapter 6 The Kontsevich invariant 6.1 Jacobi diagrams 6.2 The Kontsevich invariant derived from the formal KZ equation
6.3 Quasi-tangles and their sliced diagrams 6.4 Combinatorial definition of the framed Kontsevich invariant
6.5 Properties of the framed Kontsevich invariant
6.6 Universality of the Kontsevich invariant among quantum invariants

Chapter 7 Vassiliev invariants 7.1 Definition and fundamental properties of Vassiliev invariants
7.2 Universality of the Kontsevich invariant among Vassiliev invariants
7.3 A descending series of equivalence relations among knots
7.4 Extending the set of knots by Gauss diagrams
7.5 Vassiliev invariants as mapping degrees on configuration spaces

Chapter 8 Quantum invariants of 3-manifolds 8.1 3-manifolds and their surgery presentations 8.2 The quantum $SU(2)$ and $SO(3)$ invariants via linear skein
8.3 Quantum invariants of 3-manifolds via quantum invariants of links

Chapter 9 Perturbative invariants of knots and 3-manifolds 9.1 Perturbative invariants of knots 9.2 Perturbative invariants of homology 3-spheres
9.3 A relation between perturbative invariants of knots and homology spheres

Chapter 10 The LMO invariant 10.1 Properties of the framed Kontsevich invariant 10.2 Definition of the LMO invariant
10.3 Universality of the LMO invariant among perturbative invariants 10.4 Aarhus integral

Chapter 11 Finite type invariants of integral homology 3-sphere 11.1 Definition of finite type invariants
11.2 Universality of the LMO invariant among finite type invariants
11.3 A descending series of equivalence relations among homology 3-sphere

Appendix A The quantum group $U_q(\mathfrak{sl}_2)$ A.1 $U_q(\mathfrak{sl}_2)$ at a generic q is a ribbon Hopf algebra
A.2 $U(\mathfrak{sl}_2)$ at a root of unity is a ribbon Hopf algebra A.3 Exceptional representations of $U(\mathfrak{sl}_2)$ at $q = -1$

Appendix B The quantum \mathfrak{sl}_3 invariant via linear skein

Appendix C Braid representations for the Alexander polynomial

Appendix D Associators

Appendix E Claspers

Appendix F Physical background

Appendix G Computations for the perturbative invariant

Appendix H The quantum \mathfrak{sl}_2 invariant and the Kauffman
