<<The Serenity Of Mini>>

内容概要

The power of simplicity is fundamental to minimalist living .It is the purest essence of the home and interior ,with no redundancy or frills.although widely seen today.minimalism only took flight when Luminaries such as john pawson,Claudio silvestrin,peter zumthor and alberto campo baeza brought about far =reaching changes in the world of contemporary architecture and interiors with their minimalistic designs.This book presents 12 recently completed projects by leading architects and designers who are all worthy ambassadors of the "less is more"principle.

<<The Serenity Of Mini>>
